EDUCATION

MS in Information Systems | *Northeastern University* | Boston, MA

Sep 2024 - Dec 2026

Relevant Courses: *Designing Advanced BI Architectures, Data Science Engineering Methods and Tools, Database Design and Management, Big Data Architecture and Governance*

GPA : 3.54/4

BBA (Information Technology) | *St Joseph's University* | Hyderabad, India

Aug 2022

Relevant Courses: *Data Analytics, Statistical Analysis, Data Mining, IT Project Management*

GPA: 9.2/10

SKILLS

Programming Languages: Python, SQL, R, PL/SQL

BI & Visualization: Power BI, Tableau, DAX, KPI design, data storytelling, dashboard performance optimization

Data & Modeling: Dimensional modeling, star schema, OLTP to OLAP pipelines, Power Query, Spark SQL

Databases: Snowflake, Databricks SQL, Oracle, MySQL, PostgreSQL, SQL Server

Cloud & Platforms: Azure (Power BI Service, Azure SQL), AWS (RDS, QuickSight), Databricks

Tools: GitHub, JIRA, Excel (Pivot Tables, Power Query), Oracle SQL Developer Data Modeler

Certifications: Microsoft Azure Fundamentals (AZ-900), Google Data Analytics, Google IT Support
AWS Certified Data Engineer - Associate (in progress)

PROFESSIONAL EXPERIENCE

Accenture | Hyderabad, India

Business Intelligence Analyst

Oct 2022 – Jul 2024

- Designed and automated Power BI and Tableau dashboards for executives and operations; reduced manual reporting by 30% and sped decision cycles.
- Built optimized SQL views and DAX measures on a star schema; reduced report load time by 40% and improved refresh reliability.
- Standardized KPI definitions and published certified datasets with row-level security; improved cross-team consistency and dataset reuse.
- Automated refresh with Power Query and Databricks or Snowflake; shortened daily refresh from 45 minutes to about 10 minutes.

Teesgraph | Hyderabad, India

Data Intern

Jun 2021 – Nov 2021

- Built executive scorecards in Excel and Power BI for throughput, SLA, and utilization; improved weekly review cadence.
- Performed data cleaning and validation, increasing leadership report accuracy by 35 percent.

ACADEMIC PROJECTS

Business Intelligence Narrative Generator | [Github](#)

Aug 2025

Tech Stack: Python, Streamlit, pandas, Plotly, Google Gemini API, Markdown and HTML exporters, Git

- Converted datasets into executive narratives linked to interactive charts with KPI standardization; reduced reporting time by about 94 percent and cost by about 99 percent in staged tests.
- Added validation, error handling, and multi-format exports (HTML, Markdown, JSON); delivered board-ready outputs.

Database Management Project - E-commerce System | [Github](#)

Sep 2024

Tech Stack: Oracle Database 12c, SQL, PL/SQL, views and materialized views, Oracle VPD

- Published certified datasets via 3 views and 1 fast refresh materialized view; standardized KPIs and cut refresh from 20 minutes to 5 minutes.
- Implemented role-based access and row-level security; masked PII in views to enforce least-privilege access.

NYC Taxi Ride Demand Forecasting and Revenue Analysis | [Github](#)

Mar 2025

Tech Stack: Python, R, data.table, tidyverse, lubridate, forecast (ARIMA), ggplot2, RStudio, Git

- Built executive visuals (forecast, volatility, heatmaps, revenue-loss) from hourly aggregates; integrated ARIMA outputs into BI views.
- Quantified late-night unmet demand at 300 to 400 USD per hour and recommended staffing and dynamic pricing actions for weekend surges.
