Arjun Loya

Boston, MA | (857) 351-7562 | arjunloya.data@gmail.com | linkedin.com/in/arjun-loya | github.com/Loya-ar | arjunloya.com

Summary

Data Engineer, **2+ years**. Builds **ETL/ELT pipelines**, **dimensional models**, and **data quality** checks across **Azure Data Factory**, **Snowflake**, **Databricks**, and **PySpark**.

Education

Northeastern University | *Master of Science in Information Systems* | Boston, MA **Expected Dec 2026**

- **Relevant Courses:** Designing Data Architecture for BI, Big-Data Systems and Intelligence Analytics, Database Design

St Joseph's Degree and PG College | *BBA in Information Technology* | Hyderabad, India **Aug 2022**

Technical Skills

Languages	: Python (pandas, NumPy, PySpark, FastAPI), SQL, PL/SQL, R
Orchestration and ETL	: Azure Data Factory, Airflow, dbt, Talend, Kafka, Spark Streaming, ETL/ELT Pipelines
Data Modeling	: Dimensional Modeling (Kimball), Star and Snowflake Schemas, CDC and SCD, Medallion, ER/Studio
Databases	: Snowflake, PostgreSQL, Oracle 12c, SQL Server, MySQL, Azure SQL, MongoDB, BigQuery
Big Data and Cloud	: Databricks (PySpark), Delta Live Tables, Parquet, Azure Synapse, AWS (S3, Lambda), Docker
Data Quality	: Data Contracts, Great Expectations, Reconciliation, Anomaly Detection, PII Masking, RBAC
BI and DevOps	: Power BI, Tableau, Looker, Git, GitHub Actions (CI/CD), pytest, OpenLineage, DataHub, Jira
Certifications	: AWS Certified Data Engineer – Associate (in progress), Microsoft Azure Fundamentals (AZ-900)

Work Experience

Groflex AI **Jan 2026 – May 2026**
Data and AI Engineer Co-op *Boston, MA*

- Enforced **7-role RBAC** and **PII masking** in a **30+ endpoint FastAPI** backend, adding **schema contracts** to validate write paths before data reached storage.
- Built a documented registry of **80+ KPIs**, **gathering requirements** with business teams and wiring them into dashboards so every client metric had one agreed definition.
- Delivered **1–3 s** end-to-end **RAG** responses over **3+** client document sets, using **Azure OpenAI** embeddings with **MongoDB Atlas Vector Search** and **per-tenant index isolation**.
- Shipped backend changes through **GitHub Actions CI/CD** with passing **pytest** suites and peer pull-request reviews, using **Claude Code** for AI-assisted development.

Accenture **Oct 2022 – Jul 2024**
Data Analyst *Hyderabad, India*

- Cut **Azure Data Factory** pipeline refresh time ∼**40%** (from a **15–45 min** range) by tuning **ETL** workflows behind daily **Snowflake** loads for a Fortune 100 banking client.
- Stopped out-of-range and invalid values from reaching monthly leadership reports by building **50+ SQL validation, reconciliation, and trigger rules** across **15+ source feeds**.
- Shortened report turnaround (data load to report-ready) ∼**25%** by delivering **Power BI** dashboards on **star-schema** models with **DAX**, **Power Query**, and anomaly alerts.
- Reduced weekly manual data-prep hours ∼**20%** by automating **SQL data quality checks** on **millions of rows** per load, replacing part of a hand-run process.

Shelfmerch **Jun 2021 – Nov 2021**
Data Intern *Hyderabad, India*

- Caught duplicate and out-of-range sales records before load by writing **SQL** cleaning and validation routines.

Projects

IMDb Analytics Platform | *Databricks, Delta Live Tables, PySpark, Power BI* **GitHub**

- Engineered a **medallion** pipeline on **Databricks** with **Delta Live Tables**, processing **200M+ rows** from **7 sources**.
- Modeled a **star schema** (fact, dimension, bridge tables) for **Power BI** with **60 validation rules** and audit lineage.

Chinook OLTP to Snowflake ELT | *Azure Data Factory, Snowflake, Parquet, Key Vault* **GitHub**

- Implemented **CDC** via **SHA-256** row hashing and **merge upserts** into **SCD** dimensions, staging extracts as **Parquet**.
- Layered **ELT** from staging to curated **Snowflake** tables with **Azure Key Vault** secrets and per-layer validation counts.
